PROJECT MANAGEMENT

PLAN, COLLABORATE, DELIVER

This course takes a Project Management Approach which links with the Project Management Framework, Processes and Knowledge Areas as used in the PMBOK Guide. We look at the soft skills needed to manage a project, focusing on potential obstacles, thus enabling participants to avoid, anticipate or manage these. The approach is pragmatic, all concepts will be systematically translated into concrete applications and integrated in participants' professional context. A wide variety of didactical tools will be used, respecting David Kolb's experiential learning cycle. Followed by a delivering of a final assignment and possibly applying for the CAPM® Certificate exam.

SEMINAR LEARNING OBJECTIVES

- ✓ Have acquired knowledge of a Project Management methodology that allows them "to ask the right questions at the right moment" (method before tools).
- ✓ Can anticipate and deal with the main difficulties related to the management of a project and a project team, surpassing merely technical aspects.
- ✓ Have a general overview and understand the phases of the Project Management Body of Knowledge ("PMBOK") Guide as used by the Project Management Institute ("PMI").
- ✓ Have the required basic knowledge and the needed 23 hours of Project Management training to apply for the CAPM® (Certified Associate in Project Management) Certificate exam with the Project Management Institute ("PMI").
